

TCS ON POINT INVENTORY

Manage your on-board tank inventories while improving delivery and routing decisions.

VIEW DIGITAL OR MANUAL INVENTORY LEVELS

- » **DIGITAL** - Actual Real-Time Tank Readings
- » **MANUAL** - Reset Levels at the Rack & Subtract Deliveries

IMPROVE ROUTING DECISIONS

- » Know When Inventories Are Too Low to Complete Deliveries
- » Send Inventory Levels Back to Dispatcher via TCS HUB
- » Locate Delivery & Inventory when GPS Is Enabled & Using TCS HUB

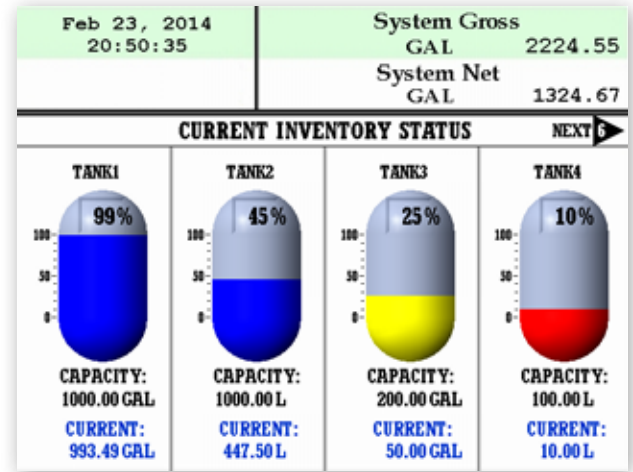

TECHNOLOGY

- » 4-20mA Current Input
- » Compatible with Float, Ultrasonic, Pressure, and Radar Sensor Technologies
- » Up to Six (6) Product Tank Inventories Available
- » Change Product Tank Assignment By Shift
- » Visual Color Graphic Level Indication
- » Quick 'Fill Up' Manual Inventory Reset Button
- » Printed Inventory Reports

The TCS 3000 Electronic Register displays the current on-board inventory of up to 6 tanks.

The inventory levels can be derived manually or taken from tank gauges.

Equipment	Description	Asset	Last Comm	Capacity	Inventory	%	Today	Yesterday	MTD

“We like the TCS 3000 register’s inventory feature because it provides our customers the ability to see their on-board inventory from the truck and office to make sure they have enough fuel for the next delivery.”

>>> Michael Curto, World Fuel Services

The TCS 3000 can electronically send data back to TCS HUB at your locations via radio, WiFi, and/or cellular modems.

TCS HUB allows you to quickly see your on-board inventory levels across your fleet. Make more informed equipment decisions. Stay on top of your customer needs.
